

Łukasz Jałocha

SOFTWARE ENGINEER

Wrocław, Poland

☎ (+48) 780 094 414 | ✉ lukaszjalocha55@gmail.com

Summary

Detail-oriented Java Backend Software Engineer with a strong technical foundation and hands-on experience in large-scale projects for industry leaders such as Capgemini, Grid Dynamics, and EPAM. Proficient in Java, Spring Boot, and Google Cloud Platform (GCP), with a proven ability to deliver high-quality solutions in Agile environments. Passionate about continuous learning, cloud technologies, and solving complex problems, while fostering effective collaboration and maintaining strong analytical and communication skills.

Work Experience

EPAM Systems

Wrocław, Poland

SOFTWARE ENGINEER

Aug. 2024 - PRESENT

- Worked in a dedicated migration team responsible for transitioning legacy systems to modern solutions.
- Acted as the main code owner of one repository, ensuring code quality, reviewing contributions, and maintaining technical consistency.
- Contributed as co-author to several related repositories, collaborating closely with other developers to deliver integrated solutions.
- Implemented new features while maintaining alignment with coding best practices and system architecture guidelines.
- Participated in Agile ceremonies (stand-ups, sprint planning, retrospectives) and contributed to continuous improvement within the team.

Grid Dynamics

Wrocław, Poland

JUNIOR SOFTWARE ENGINEER

Feb. 2024 - Dec. 2024

- Contributed to two projects: long-term maintenance of an API (bug fixing, stability improvements, and gradual feature development) and a short-term cross-functional initiative focused on delivering a new feature within a larger distributed system.
- Implemented new features and resolved issues to enhance application functionality and reliability.
- Authored and maintained documentation for technical processes and system components to ensure transparency and effective knowledge sharing.
- Performed detailed code reviews to uphold coding standards and maintain project quality.
- Actively participated in Scrum ceremonies (stand-ups, sprint planning, retrospectives), contributing to agile delivery and team collaboration.

Capgemini

Wrocław, Poland

SOFTWARE ENGINEER INTERN

May. 2022 - April. 2023

- Completed a structured educational path in backend development, including online courses and practical assessments, to enhance technical proficiency.
- Maintained detailed documentation of technical processes and project specifics to ensure knowledge transfer and future reference.
- Actively participated in all phases of the Agile Scrum process, including daily stand-ups, sprint planning, and architecture planning meetings.
- Contributed to application feature development and enhancement, as well as bug resolution, ensuring alignment with client requirements.

Skills
